

General characteristics:

- Hyper-ruggedized milled metal housings are vandal proof and tamper proof
- Zero power required for switch operation: ideal for solar or battery powered systems
- Totally waterproof keypad: used outdoors from the Artic Circle to Saudi Arabia
- Matrix output standard with no need for costly ASIC interface
- USB, PS2, ASCII, UART, I2C and custom output protocols available as well
- Activated by human touch, wet or gloved hands, or any type of tool
- Standard configurations as well as custom alpha-numeric layouts from 2 keys to 100 keys
- Excellent value for demanding environments, low cost of ownership over time
- Proven reliability for 24/7/365 operation (we have keypads in continuous use for 20 years as gate controllers)
- Industry leading five year warranty in extreme environments

Electrical data

Standard Output	Matrix / Common Bus
Contact Arrangement	SPST N.O.
Switching Voltage	1-24V AC/DC
Switching Current	200mA
Force required for switch operation	3-5N

Mechanical data

Materials	Aluminium/Stainless Steel
Graphics	Anodized Printing/Laser Engraving
Electrical Connection	Flat Cable/Pins
Available Interfaces	RS232 / RS485 / USB / I2C / ASCII / UART

Environmental Specifications

Operating Temperature	-20°C to +85°C	
Exceeds Class 1 Div 1 hazardous location requirements		
Impact proof to IK10		
IP68-IP69K wash-down proof up to 100 Bar (many submerged installations)		
Compliant with IEC/EN 60529, CE, ROHS, REACH		
Neither creates, nor is effected by ESD, RFI or EMI. EMP-proof versions available as well
